

G+H Systems establishes technology partnership with Neo4j to advance innovative IAM solutions

Strategic partnership strengthens graph-based Identity & Access Management technology

[Offenbach, Nov 10th, 2025] – G+H Systems GmbH, specialized in Identity & Access Management, announces the establishment of a strategic technology partnership with Neo4j, the world's leading graph intelligence platform. This cooperation underscores the commitment to developing innovative and scalable IAM solutions that meet the complex requirements of modern IT landscapes.

Graph database technology as the foundation for next generation IAM

The collaboration builds on the already successful integration of the Neo4j graph database into daccord, the IAM software developed by G+H Systems.

"We have been using Neo4j's graph database technology in our IAM software daccord for several years now. This new technology partnership enables us to offer our customers even more innovative IAM solutions," says Thomas Gertler, Managing Director of G+H Systems. "Graph databases are ideally suited for IAM applications, as they map the complex relationships between people, accounts, permissions, and systems even more transparently and efficiently while ensuring maximum performance and scalability."

"Neo4j is pleased to partner with G+H Systems, creating powerful solutions that deliver new possibilities and positive outcomes for customers," said Jean Jacques Putters, RVP EMEA Central, Neo4j. "Our growing Neo4j partner ecosystem verifies the unique capabilities of graph database and analytics, transforming data into actionable knowledge to power the next generation of intelligent applications and AI systems."

Added value for customers through extended functionalities

Through the technology partnership with Neo4j, daccord customers benefit from:

- **Improved Performance:** Graph-based queries enable faster analysis of complex permission structures
- **Extended Analysis Capabilities:** Deeper insights into relationships and dependencies between users, roles, and systems
- **Scalability:** Optimal support for growing IT landscapes and increasing data volumes
- **Innovative Features:** Access to the latest graph technologies and algorithms for advanced IAM use cases
- **Product-Specific Extensions:** Individual extension of database functionality for automatic and audit-proof history storage and processing of change events

Over 20 years of experience meets innovative technology

With over 20 years of project experience in IAM implementations across various industries and company sizes, G+H Systems brings comprehensive expertise to the partnership. The combination of proven IAM competence and advanced graph database technology creates a solid foundation for forward-looking solutions.

"Our customers expect not only proven IAM functionalities from us, but also innovative approaches to tomorrow's challenges," emphasizes Jürgen Bähr, Managing Director of G+H Systems. "The partnership with Neo4j ensures that we can continue to use state-of-the-art technologies in our solutions in the future."

Modular approach for individual requirements

The daccord software with its modular building block system enables customers to build and expand their IAM system step by step. Neo4j's graph technology supports the flexible architecture and ensures optimal performance even with complex configurations.

Outlook

The technology partnership is an important building block in the further development of the daccord IAM solution. Both companies are continuously working on the integration of new graph-based functionalities and the optimization of existing processes.

About daccord

daccord is a brand of G+H Systems GmbH, a leading provider of Identity & Access Management solutions with over 20 years of experience in implementing and supporting IAM systems. The company helps customers across various industries to increase their IT security, meet compliance requirements, and automate administrative processes. The modular daccord Next Gen platform enables companies to customize their IAM system and expand it step by step. Learn more at daccord.de.

About Neo4j

Neo4j is the graph intelligence platform that transforms data into knowledge to power the next generation of intelligent applications and AI systems. Trusted by 84 of the Fortune 100, Neo4j enables accurate, explainable, and governed AI through its enterprise-ready graph database and analytics capabilities across any environment or data source.
